

1. Executive Summary

Omnivest is an **AI-powered financial analysis platform** designed to give individual investors—especially those at the start of their investment journey—**greater access to clear, data-driven insights**.

The platform aggregates, organizes, and interprets public financial information while offering a **predictive analytics engine** that helps users understand potential stock performance and portfolio outcomes.

By simplifying complex financial data through friendly visual interfaces and AI predictions, Omnivest empowers new investors to make informed, confident, and strategic decisions.

Mission: Give every investor access to intelligent, transparent, and predictive financial analysis tools.

Vision: Bridge the gap between professional-grade analytics and everyday investors through AI-driven insight and intuitive design.

2. Company Description

Company Name: Omnivest

Founders:

- Luca Sarhan Giberti
- Igor Scapin Francisco Garcia

Headquarters: São Paulo, Brazil

Institutional Origin: Inteli – Instituto de Tecnologia e Liderança

Omnivest was born from the recognition that **public financial data is abundant but inaccessible** to most investors. The platform makes this information not only available but **actionable**, combining public datasets with proprietary predictive models and a user-friendly interface.

3. Problem Statement

The modern investor faces an overwhelming landscape of fragmented and highly technical financial information. While data exists in abundance (e.g., CVM filings, B3 reports), it is **difficult to interpret, compare, and apply** without prior expertise or expensive software.

Challenges faced by new investors:

- Lack of accessible, centralized data sources.
- No intuitive way to interpret trends or valuations.
- Limited access to predictive tools commonly used by professionals.

Omnivest delivers **clarity and predictive intelligence**, enabling users to base decisions on comprehensive, structured, and AI-analyzed data.

4. Products and Services

Omnivest is built on four core value pillars.

4.1 Predictive Analysis

Advanced AI models trained on historical financial and market data forecast **future stock tendencies**, helping users identify potential growth opportunities and risk exposure.

4.2 Portfolio Optimization

Dynamic algorithms recommend **optimal asset allocations** according to each investor's profile and prevailing market conditions.

4.3 Automated Reporting

Automatic generation of **concise and insightful financial summaries**, allowing users to track portfolio evolution quickly and clearly.

4.4 Public Information Dashboard

A custom data visualization environment within the platform that:

- Displays public financial and sector data collected by Omnivest.
- Allows intuitive browsing, comparison, and search of companies.
- Transforms raw financial information into clear charts and standardized metrics.

This dashboard acts as a **data democratization layer**, delivering immediate value even before users subscribe to predictive services.

5. Market Analysis

5.1 Target Audience

Omnivest primarily serves:

- **Individual investors aged 18–35** entering the investment market.
- Users with **limited financial knowledge** seeking automated data interpretation.
- Tech-oriented individuals interested in **data visualization and predictive tools** for self-managed portfolios.

5.2 Market Opportunity

Brazil's retail investor base has expanded rapidly through digital brokerage platforms; however, **data interpretation remains a key bottleneck**. Omnivest positions itself between **traditional data platforms** (e.g., Status Invest, Trademap) and **institutional analytics tools** (e.g., Bloomberg, Refinitiv), offering professional-grade intelligence with consumer-level usability.

5.3 Competitive Advantage

- Simplified access to structured, AI-processed public data.
- Proprietary predictive models not available in free platforms.
- Clean and intuitive user experience designed for non-specialists.

6. Business Model

Omnivest operates under a **paid subscription model with a 30-day money-back guarantee**.

6.1 Rationale

- Encourages commitment from serious users.
- Avoids high infrastructure costs associated with freemium traffic.
- Builds **trust and credibility** through a transparent refund policy.

6.2 Pricing Example

- **Monthly Plan:** R\$35
- **Annual Plan:** R\$350 (equivalent to two free months)
- **30-day satisfaction or full refund guarantee**

Model	Advantages	Limitations
Freemium	Large user funnel	High infrastructure cost, low conversion

Model	Advantages	Limitations
30-Day Guarantee	Trust-based entry, qualified users	Requires strong onboarding and retention

7. Marketing and Lead Strategy

7.1 Positioning

Omnivest is positioned as **“the intelligent assistant that helps you invest with confidence—no finance degree required.”**

7.2 Marketing Objectives

1. Establish Omnivest as the leading predictive analysis tool for beginner investors in Brazil.
2. Drive qualified sign-ups through targeted digital acquisition.
3. Build long-term credibility through transparency and open data access.

7.3 Core Channels

- **Content-Based Outreach:** Articles, visual posts, and short videos explaining market movements, AI forecasts, and Omnivest insights.
- **Influencer Collaborations:** Partnerships with creators focused on investment tools rather than financial education.
- **Performance Marketing:** Google and Meta Ads targeting queries related to stock selection and market prediction.
- **Email Capture and Retargeting:** Access to the public dashboard as a lead magnet, followed by personalized insight emails.
- **University and Community Partnerships:** Introduction of Omnivest to finance clubs and business programs.

7.4 Lead Capture Funnel

1. Landing page highlighting predictive insights and refund policy.
2. Public dashboard with free access to structured market data.
3. Email onboarding introducing AI-driven predictions.
4. Subscription conversion with 30-day guarantee.
5. Retention via personalized reports, surveys, and referral programs.

8. Business Objectives

- 1. Launch an MVP featuring predictive analytics, portfolio optimization, and the public dashboard.
- 2. Reach **500 paying subscribers** within six months.
- 3. Convert **10% of dashboard visitors** into subscribers.
- 4. Achieve **break-even** within 24 months.
- 5. Establish Omnivest as Brazil’s most transparent AI-driven analysis platform.

9. Operations Plan

- **Technology Stack:** FastAPI (backend), React with TypeScript (frontend), PyCaret and XGBoost (AI models).
- **Hosting:** Amazon Web Services (AWS).
- **Development Methodology:** Agile sprints with biweekly releases.
- **Data Sources:** Public B3 datasets.
- **Compliance:** LGPD-compliant user data management.
- **Customer Support:** Email and in-app chat, integrated with feedback and refund workflows.

10. Management and Team

Member	Role
Luca Sarhan Giberti	Co-Founder
Igor Scapin Francisco Garcia	Co-Founder

11. Risk Analysis

Risk	Mitigation Strategy
Low initial adoption	Use public dashboard as a qualified lead generator
Predictive model inaccuracy	Continuous retraining and human-in-the-loop validation

Risk	Mitigation Strategy
Trust barriers	Transparent refund policy and performance reporting
Regulatory or API limitations	Source diversification and legal compliance reviews

12. Future Outlook

Following market validation, Omnivest plans to:

- Expand the public dashboard into a full-featured analytics environment.
- Integrate lightweight sentiment indicators, including news keywords and volatility signals.
- Offer **enterprise-grade APIs** for B2B licensing once predictive accuracy stabilizes.
